CYBERSECURITY COMPLIANCE ASSESSMENTS

Align your business with the frameworks that matter

Cybersecurity compliance doesn't have to be overwhelming.

Our Cybersecurity Compliance Assessment service helps you understand your current posture, map it to a relevant framework, and create a clear, achievable roadmap to meet your regulatory or partner requirements.

🔍 What Is a Cybersecurity Compliance Assessment?

A **Cybersecurity Compliance Assessment** evaluates how well your organisation aligns with one or more recognised cybersecurity frameworks or regulatory requirements.

We break down the jargon, reduce the noise, and help you:

- Understand what's required and what's not
- Identify gaps in controls, documentation, and processes
- Build a realistic plan based on your size and resources
- Communicate progress clearly to clients, boards, or auditors

---

⚖️ Frameworks We Commonly Assess Against

- Essential Eight (ACSC) – Ideal for SMBs, councils, and local government
- ISO/IEC 27001 – Global standard for information security management systems
- ACSC ISM – Used by Australian government and critical infrastructure
- PCI-DSS – Required for handling credit card information
- SoCI Act – For regulated critical infrastructure providers
- NIST CSF / 800-53 – Risk-based and modular; used across sectors
- SMB1001 – Foundational cybersecurity controls tailored for small businesses

Not sure which framework applies? We can help you choose the right one.

🧰 What's Included

- ✅ Kickoff session to identify relevant frameworks and scope
- ✅ Controls-based assessment (aligned to chosen framework)
- ✅ Gap analysis + traffic light scoring
- ✅ Customised compliance roadmap (3–12 months)
- ✅ Executive summary for board or funding bodies
- ✅ Optional evidence mapping for audits or certifications

🧩 Tailored for Your Sector

- Local Councils – Alignment to Essential Eight and ISM for grant funding and audit readiness
- Not-for-Profits – Privacy and governance focus aligned to donor, government or partner expectations
- SMBs – ISO 27001-lite reviews to support vendor due diligence, tenders, or business insurance
- Health/Education – Privacy and data protection assessments tied to sector-specific guidelines
- Defence/Contractors – CMMC-style reviews to prepare for ADF or DoD engagement

CYBERSECURITY COMPLIANCE ASSESSMENTS

Align your business with the frameworks that matter

What Our Clients Say

"vCISO.One helped us understand exactly what the Essential Eight meant for us — and what to prioritise. Their report was board-ready, action-focused, and easy to follow."

— Corporate Services Manager, Regional Council

When to Use This Service

- Before pursuing ISO 27001 certification
- When preparing for a cyber insurance or vendor security questionnaire
- During risk planning or cyber uplift projects
- When facing regulatory scrutiny or a sector-wide uplift initiative
- As a first step in maturing your cyber posture

Optional Add-Ons

- Policy & procedure development
- GRC platform integration (see our GRC as a Service (GRCaaS) service offering →)
- Staff training aligned to compliance controls
- Annual or quarterly refreshes for ongoing tracking

Take the Guesswork Out of Compliance

Let us help you understand where you stand — and how to move forward with confidence.
