

Most breaches start with a human click.

Our Cybersecurity Awareness Training programs are designed to educate your team, reduce risk, and build a security-conscious culture across your organisation — no jargon, just real-world relevance.

Why Cyber Awareness Matters

Technology alone won't stop phishing, ransomware, or insider threats — your people need to recognise and respond to suspicious activity before damage is done.

Security awareness training is now expected by:

- Cyber insurers
- Regulators and auditors
- Industry frameworks (Essential Eight, ISO 27001, PCI-DSS)
- Business partners and enterprise clients

Whether you need one-time training or an ongoing program, we tailor it to your risk profile, industry and team.

What We Offer

Staff Awareness Training (Onsite or Virtual)

- Engaging training for all staff — tailored to your systems, roles, and policies
- Covers phishing, passwords, social engineering, privacy, and data handling
- Delivered in plain English with relatable examples
- Optional quizzes or sign-off tracking for compliance

Phishing Simulation Campaigns

- Safe, realistic phishing emails sent to your team
- Identify users at risk and track improvements over time
- Immediate feedback and micro-learning for recipients
- Fully managed or co-managed options

Executive & Board Cyber Briefings

- Cyber risk explained in business terms for decision-makers
- Legal exposure, governance responsibilities, and common attack types
- Support with meeting Essential Eight or ISO/ISM governance obligations
- Ideal for risk committees, boards, and senior leadership

Who This Is For

- **Councils and local government** seeking to meet Essential Eight Maturity Level 2+
- **Not-for-profits** with limited in-house IT but growing data and compliance needs
- **SMBs** that need cost-effective training to satisfy insurance or client requirements
- **Boards and executives** looking for clarity on cyber obligations and oversight
- **Schools and aged care providers** working with sensitive data and external systems

What Our Clients Say

“The training was clear, no-nonsense, and relevant to our people. We immediately had better awareness — and staff actually enjoyed it.”
— IT Manager, Community Legal Service

Deliverables You'll Receive

- | | |
|---|---|
| ✓ Custom training content aligned to your environment | ✓ Staff sign-off tracking (if required) |
| ✓ Live or on-demand training sessions | ✓ Executive/board summary report |
| ✓ Campaign metrics for phishing simulations | |

Benefits of Cyber Awareness Training

- | | |
|--|---|
| ✓ Reduce phishing risk | ✓ Enable faster incident reporting |
| ✓ Meet compliance & audit expectations | ✓ Build internal confidence around security |
| ✓ Improve security culture | |

Optional Add-Ons

- Annual refresher training
- Policy awareness modules (AUP, IR, Data Handling)
- LMS integration for SCORM-compliant environments
- Simulated attack reports for board presentations
- Integration with broader vCISO, MSS, or risk programs
