CYBER RISK ASSESSMENTS

Prioritise what matters. Build clarity, resilience, and board confidence

You Can't Protect What You Haven't Assessed.

Our Cybersecurity Risk Assessments help you uncover the threats, vulnerabilities, and gaps that matter most — so you can make informed decisions with confidence. We deliver a clear view of your current security posture, aligned to trusted frameworks and tailored to your organisation's priorities, resources, and risk appetite.

🔍 What Are Cyber Risk Assessments?

Cyber Risk Assessments are structured evaluations of your organisation's security posture. They go beyond checklists and compliance — helping you identify what's truly at risk, how likely incidents are, and what impact they could have.

We use industry-recognised frameworks like the NIST Cybersecurity Framework, ACSC ISM, Essential Eight, CIS Controls, and ISO/IEC 27005 to guide our process and ensure credibility.

Each assessment is practical, prioritised, and focused on outcomes — giving you a clear view of where you stand today, where you need to be, and how to get there.

✅ What's Included

A structured review of your current cybersecurity posture using recognised frameworks such as:

- NIST Cybersecurity Framework (CSF)
- ACSC ISM or Essential Eight
- CIS Controls
- ISO/IEC 27005

We help you:

- Identify key assets, threats, and vulnerabilities
- Assess likelihood, impact, and existing controls
- Prioritise your remediation based on real risk
- Develop a practical, phased security roadmap

Deliverables:

- ✅ Facilitated risk discovery session
- ✅ Custom risk register (if one doesn't exist)
- ✅ Risk heatmap and maturity summary
- ✅ Executive summary + actionable roadmap

This is ideal as a starting point before compliance projects, GRC implementations, or vCISO engagements.

💬 What Our Clients Say

"The risk assessment gave us a clear picture of where we stood and what needed attention. For the first time, we had a roadmap we could actually act on — and our board finally understood the why behind our priorities."

— IT Manager, Regional Council

CYBER RISK ASSESSMENTS

Prioritise what matters. Build clarity, resilience, and board confidence

Who This Is For

- **Councils and NFPs** preparing for Essential Eight or ISM compliance
- **SMBs** starting or reviewing their cybersecurity journey
- **Organisations** responding to cyber insurance or tender requirements
- **Any business** needing defensible risk visibility at the executive level

---

Optional Add-Ons

- Integration into a GRC platform (see our GRC as a Service (GRCaaS) offering →)
- Tabletop exercises based on key risk scenarios
- Ongoing risk review cycles (e.g. annual or semi-annual)

Know Your Risks. Act with Purpose.

Don't wait for an incident to expose your blind spots.
Let's assess your cybersecurity posture, prioritise what matters, and build a risk-informed plan you can trust.
